

# SquareML IoT To Handle Massive Healthcare Data

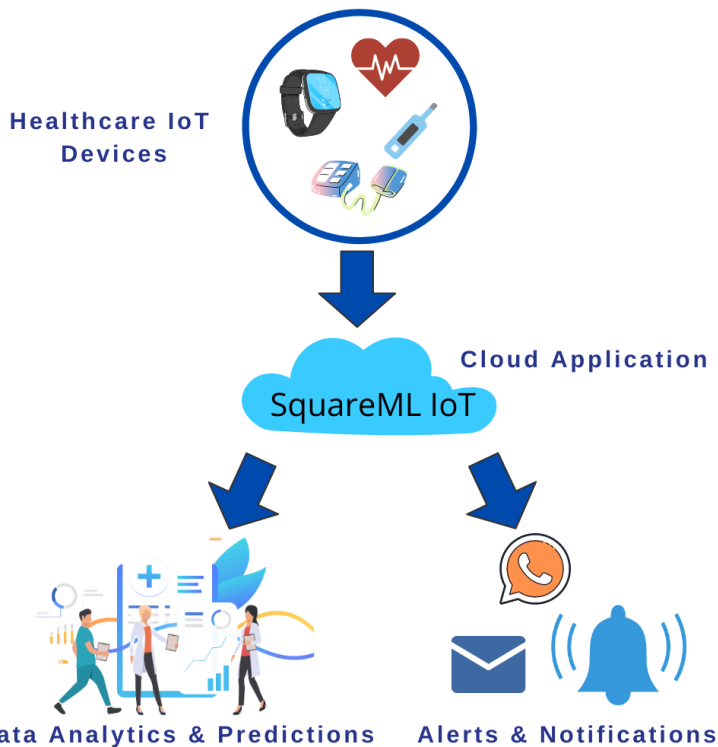

Harness the power of enormous healthcare data with SquareML IoT. It's a unique cloud-based solution to capture, access, analyze, and apply analytics on all the healthcare data received through the Internet of Things (IoT)-enabled devices. It extracts powerful insights from your data to enable better patient care and evidence-based treatment by the physicians.

## How SquareML IoT Helps You Deliver Top-Class Care?

- Real-time remote monitoring of patient's health
- Access of health data to patients and physicians
- Timely alerts/notifications in case of abnormality
- Tools to analyze data and plan for better treatment
- Efficient and easy patient-doctor interactions
- Improved patient satisfaction

## Healthcare IoT

## How SquareML IoT Helps Individuals Better Manage Their Health?

- Monitor real-time data with healthcare devices
- Update health data on SquareML IoT
- Send timely alerts/notifications to healthcare professionals/doctors in case of anomalies
- Identify patient risk status
- Analyze historic data and get valuable health information
- Get predictions on future health and plan treatment accordingly
